

## The FT-4500 series

The FT4500 Series filtration system is the ideal product for water and solid removal from oils and fuels. Its compact foot, rugged design and high filtration efficiency make it the natural choice for filtration applications whilst on the move. It can also be used as a "by-pass" or recirculation filtration system for ensuring permanent cleanliness of your oils and fuels

### Benefits

- Ideal for Mobile Service Technicians
- Ideal for fluid transfer/top-up applications
- Low cost
- Hand-held, light weight
- High performance filtration
- Versatile for several fluid options
- Suitable for oils and fuels
- Low cost consumables

### Features

- Rugged transfer pump 3-5 l/min flow
- FTP180 Filter housing
- Compact footprint
- Strainer for pump protection
- Supplied complete with hoses and extension lances
- Long life replacement cartridges
- Water and solid contamination removal
- On/Off Switch
- Over-pressure protection safety features
- Integral Drip Tray
- Inlet/Outlet ports ½" BSP
- Pressure Gauge indication
- Fluid sample point fitted

### Supplied complete with:

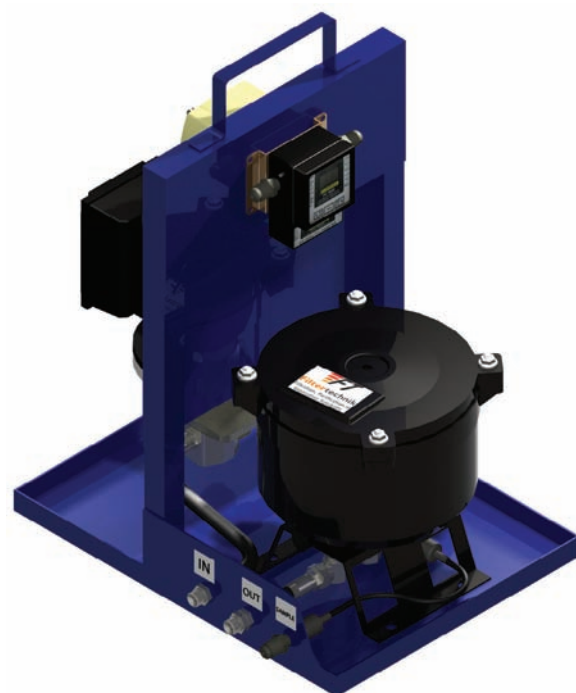

- Suction and Return hoses 3 m
- Suction and return lances 1m
- Filter cartridge fitted
- Instruction manual

### The FT-4500-PC Series

All the features of the standard unit fitted with a PC9000 on-line particle counter. This allow for instant readings of oil and fuel cleanliness. Cleanliness levels are displayed as an easily recognizable code: ISO 4406

### Supplied with:

- All the items as listed above for the standard FT-4500 unit
- On-line particle counter
- PC Software package
- Fiber-optic transfer cable
- Connection Dongle
- Cleanliness Chart comparison sheet
- Instruction Manual for PC9000
