

Biodiesel Purification Technology Open Day

This is an excellent opportunity to understand high quality biodiesel purification at the lowest possible cost. Attendees find these days to be beneficial not only to understand biodiesel purification techniques, but also to discuss all aspects of biodiesel production amongst themselves in a relaxed, informal environment.

We cater for all levels of producer and combine theoretical knowledge with hands-on practical demonstrations.

Our mission is that you leave here fully equipped with a better understanding of biodiesel production of the very highest quality.

Agenda

11.00: Doors open: Morning coffee: Introduction - Meet the specialists and fellow attendees ...

11.15: Biodiesel: An overview: Background, basics, technical specs, common myths dispelled.

11.30: Biodiesel production processes: Pre-treatment, transesterification, purification and safety.

11.45: Biodiesel purification: Getting it right: How, why and what is quality biodiesel anyway?

12.30: Lunch break

13.30: Live Ecopure demonstration with in house quality testing training

If you would like to bring your own Biodiesel, we can show you how easy it is to purify biodiesel using our systems.

14.45: Q & A session & Networking - Special day rates available for pre-orders taken on the day.

16.00: Close - Thanks for a great day !
