

SFC-4000 Mobile Single Pass Filtration Unit

The SFC-4000 is a mobile filtration unit designed to provide single pass filtration on hydraulic and lubrication oils. A variable speed drive ensures smooth operation over a large range of viscosities and applications.

Suitable for industrial applications such as:

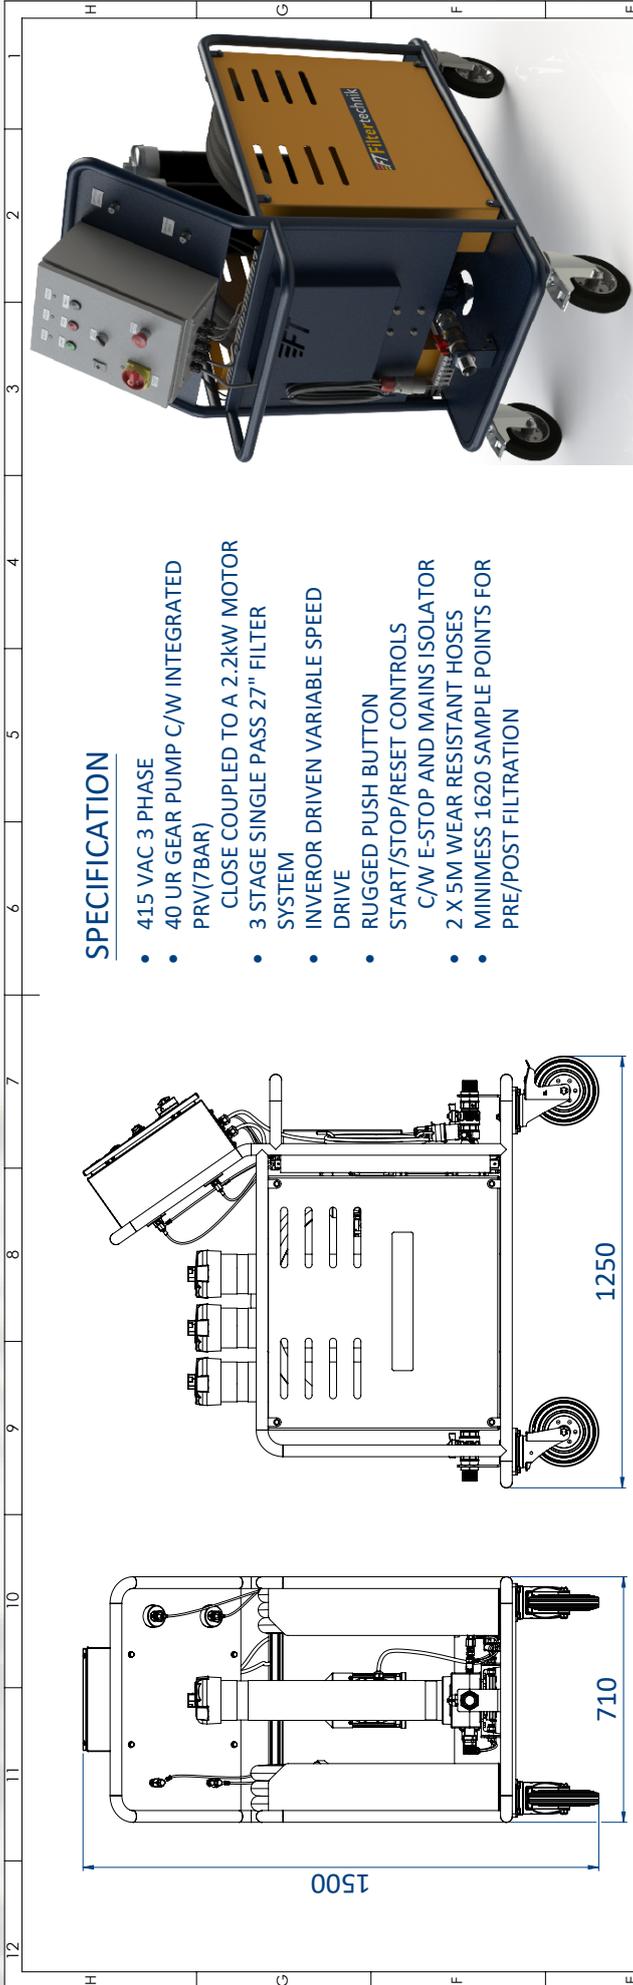

- **Mobile Plant**
- **Power Generation**
- **Automotive**
- **Aerospace**
- **Pulp and Paper**

Introduction

The SFC-4000 mobile filtration unit is designed for continuous use or transfer duties on hydraulic and lubrication oils. A rugged self-priming internal gear pump, fitted with an inverter controlled variable speed drive, provides filtration flow rates up to 120 L/min, making this unit suitable for all applications from mobile plant up to large volume tanks and gear boxes. 3 stages of filtration using 27" K-series elements from Schroeder Industries allows for single pass use with a dirt holding capacity of over 1Kg.
